**AT&T MOBILITY SPECTRUM LLC AND RAINBOW TELECOMMUNICATIONS
ASSOCIATION, INC., SEEK FCC CONSENT TO THE ASSIGNMENT OF
A PARTITIONED LOWER 700 MHZ C BLOCK LICENSE IN KANSAS**

WT Docket No. 16-111

PLEADING CYCLE ESTABLISHED

Petitions to Deny Due: December 27, 2016
Oppositions Due: January 3, 2017
Replies Due: January 10, 2017

I. INTRODUCTION

AT&T Mobility Spectrum LLC, an indirect wholly-owned subsidiary of AT&T Inc. (together with AT&T Mobility Spectrum LLC, AT&T), and Rainbow Telecommunications Association, Inc. (Rainbow, and together with AT&T, the Applicants), have filed an application pursuant to Section 310(d) of the Communications Act of 1934, as amended,¹ seeking the assignment of a partitioned Lower 700 MHz C Block license from Rainbow to AT&T. The subject license covers a local market in Kansas, and the area proposed to be partitioned to AT&T covers a single county within that local market.

The Applicants maintain that the proposed transaction would provide AT&T with additional spectrum that would enable it to increase its system capacity to enhance existing services, better accommodate its overall growth, and facilitate the provision of additional products and services in one county, Leavenworth County, in Cellular Market Area (CMA) 432 (Kansas 5 – Brown). The Applicants assert that, as a result of this proposed transaction, AT&T would hold 24 megahertz of contiguous, paired Lower 700 MHz spectrum in Leavenworth County, allowing for a 10×10 megahertz LTE deployment.

Our preliminary review indicates that AT&T would be assigned 12 megahertz of Lower 700 MHz C Block spectrum covering Leavenworth County in this CMA. Post-transaction, AT&T would hold 170 megahertz of spectrum in total, including 80 megahertz of below-1-GHz spectrum, in this county in Kansas 5 – Brown. Specifically, AT&T would hold both cellular licenses, as well as 30 megahertz of Lower 700 MHz spectrum.

The *Mobile Spectrum Holdings Report and Order* requires that we treat any proposed increase in below-1-GHz spectrum holdings resulting in the acquiring entity holding approximately one-third or more of the suitable and available spectrum below 1 GHz as an “enhanced factor” in our case-by-case review.² The *Mobile Spectrum Holdings Report and Order* also requires that, where the entity acquiring

below-1-GHz spectrum already holds approximately one-third or more of the below-1-GHz spectrum in a particular market, the demonstration of the public interest benefits of the proposed transaction would need to clearly outweigh the potential public interest harms, irrespective of other factors.³ In Leavenworth County in Kansas 5 – Brown that is the subject of the proposed transaction, AT&T already is attributed with 68 megahertz of below-1-GHz spectrum. As a result of the proposed transaction, AT&T would further increase its attributable low-band spectrum holdings to 80 megahertz, or approximately 60 percent of the total currently suitable and available low-band spectrum for the provision of mobile telephony/broadband services.
